OF THE UNITED STATES WITHIN THE MEANING OF TITLE 18, SECTIONS 793  
AND 794, OF THE U. S. CODE, AS AMENDED. ITS TRANSMISSION OR REVEL-  
ATION OF ITS CONTENTS TO OR RECEIPT BY AN UNAUTHORIZED PERSON  
IS PROHIBITED BY LAW. THE REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

25X1

1. In Jaworzno (Q51/Y76), near Krakow, reinforced concrete bunkers are being made by prisoners in a forced labor camp. Heavy gravel is taken from the Oder in the vicinity of Wroclaw and shipped by rail to Jaworzno.
2. The bunkers are round, about 2.5 meters high and have an inside diameter of one meter. The top of the bunker is movable and detachable. The walls are 30 centimeters thick. The entrance is 70 centimeters high and 50 centimeters wide and is provided with hinged concrete doors of the same thickness of the walls and so constructed that when closed the outer door surface is flush with the outside of the bunker. The bunkers have the usual firing slits. They are to be buried 0.5 meters in the ground.
3. Piles of these bunkers have been observed at the railroad stations at Przywory Opolskie and Groszowice. Army transports take them from there to unknown destinations.
